# Introduction

College life is a rollercoaster ride, filled with academic demands, financial obstacles, and personal development. It's no surprise that many students find themselves overwhelmed and stressed by these challenges. However, the presence of friends can make all the difference, providing much-needed support and creating unforgettable moments. Hanging out with friends not only offers a break from the rigors of college but also contributes to personal growth, stress relief, social connections, improved mental well-being, and academic success. Recognizing the power of friendship, we propose the development of a website that helps college students discover the ideal hangout spots, saving them time and nurturing a vibrant sense of community.

# Target Audience

The website targets college students seeking suitable places to hang out, study, and relax with peers. It caters to students of diverse backgrounds and academic disciplines, enrolled in colleges or universities. The website aims to facilitate community building, local exploration, and an enhanced college experience. It provides a curated selection of ideal hangout spots, fostering a lively and collaborative environment. Designed specifically for college students, it meets their unique needs and interests.

# Limiting Factors

Limited Dining Options on Campus: The best limiting factor for college students at RTU looking for a spot to eat is the limited availability of dining options on campus. If the university lacks a sufficient number of cafeterias, food stalls, or restaurants, it can pose a significant challenge for students to find convenient and diverse meal choices within the university premises. This limitation may result in long queues, overcrowding, and difficulty finding seats during peak meal times, ultimately impacting the overall dining experience for students.

THE G-SPOT!

HOME ABOUT CONTACT

## ABOUT

The G-Spot! was established by a group of friends enrolled in Rizal Technological University to help their co-students easily navigate places like restaurants, coffee shops, computer shops, or anywhere that's been frequently visited or suggested by most students from their university.
